Date- 7th April 2023

We partnered with PRETECH since July 2020 for their services to make our existing laxative manufacturing plant automation to digitally comply with the ICHQ-7, EU-GMP and US FDA requirements.

With consistent technological support and services from PRETECH, the entire process data is acquired automatically and available in digitalised form for analytics / planning.

We are now delighted to have the digitally compliant plant and also to have fully automated batch operations through this partnership.

This digitalisation has resulted in to gains such as increased productivity, which has been up by about 57 % and substantial reduction in the cost of energy as an added advantage.

We look forward to a long term partnership with PRETECH for all our future projects.
